

Another Example: isPrime

Planning isPrime

1.4.2 Planning isPrime

Generalizing isPrime

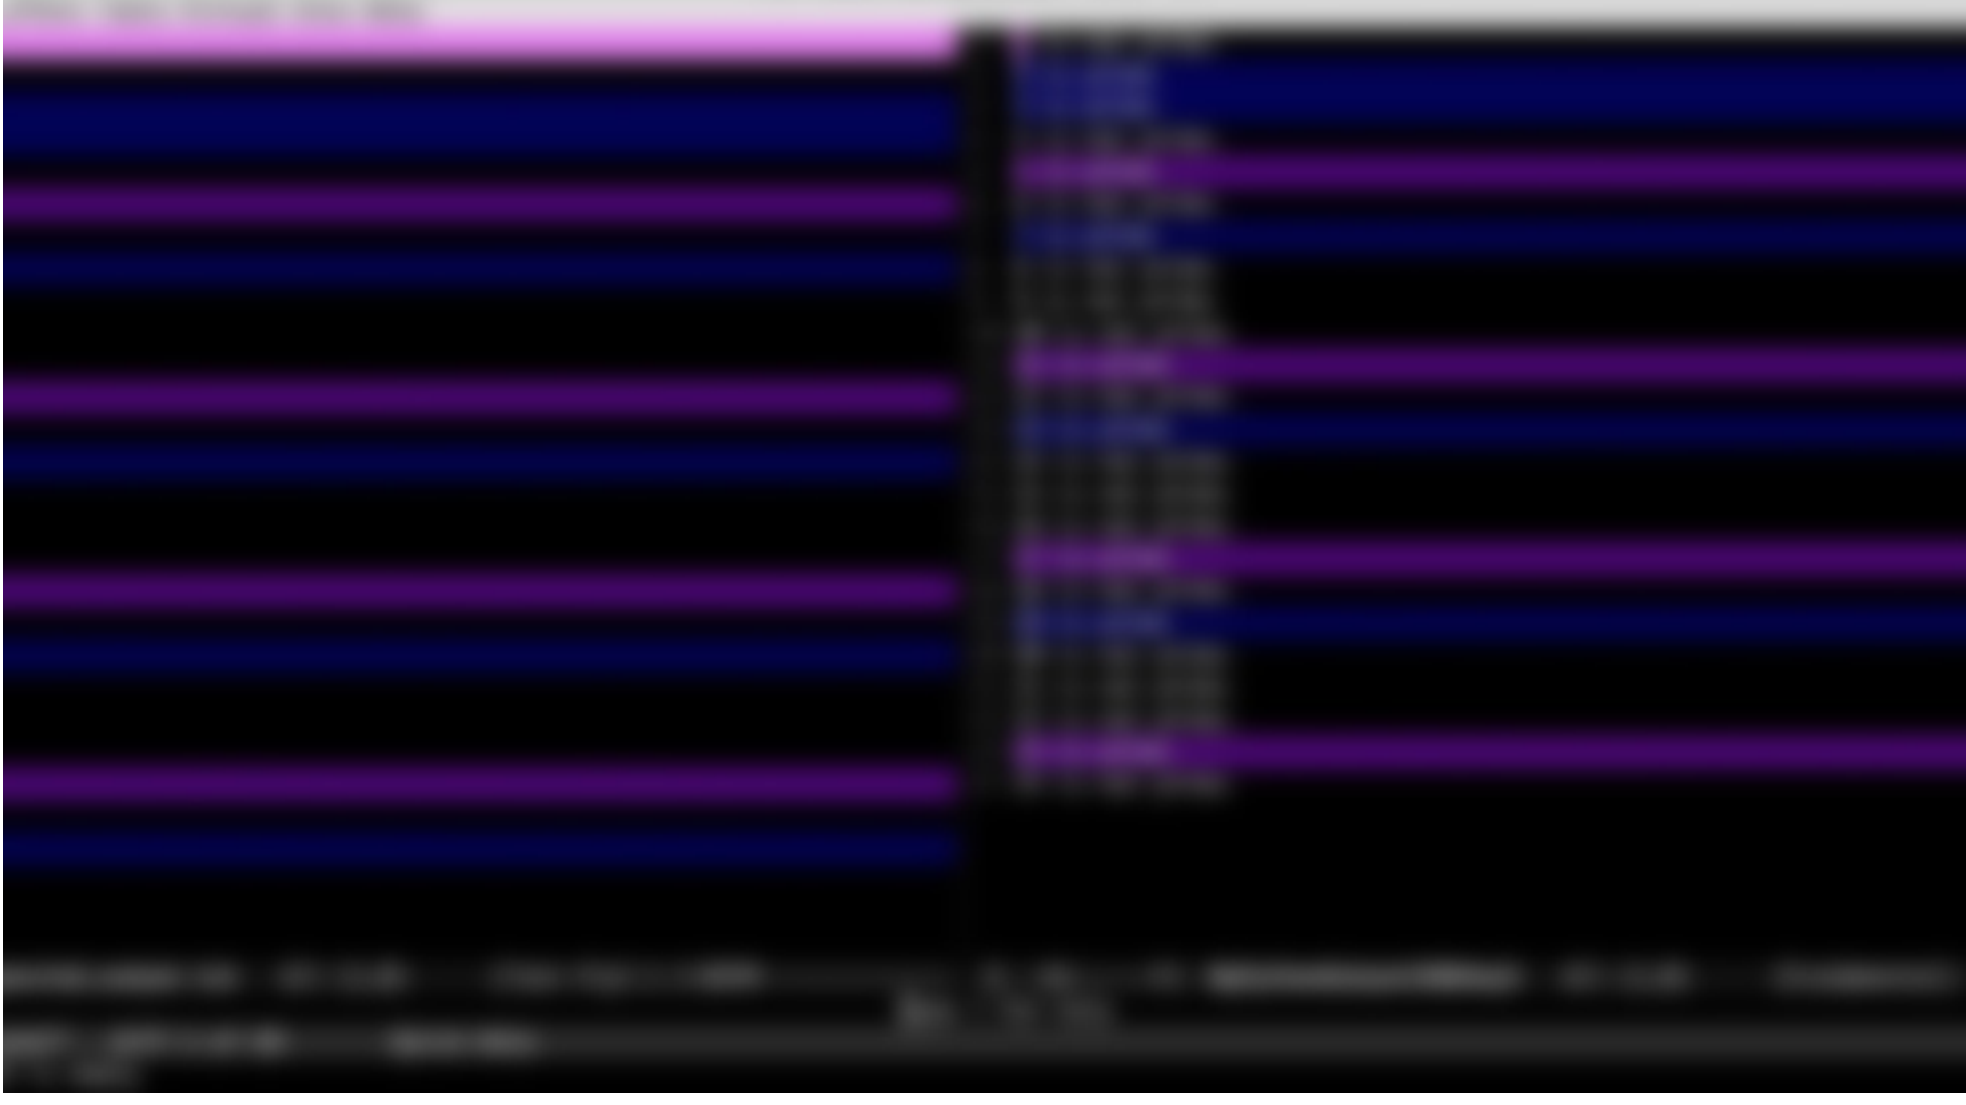

1.4.3 Generalizing isPrime

Converting isPrime to Python

Comparing Output with ediff in Emacs

Tuples

Day 4, Part 3

Now it is time to do **04_max** on the Mastery Learning Platform. Login to the course server, go to **04_max** in your Git repository and read the README for directions. When you have passed that assignment, continue with the next two assignments.

Next, it is time to do **05_triangle** on the Mastery Learning Platform. Login to the server, go to **05_triangle** and read the README for directions. When you have passed that assignment, continue to the next one.
